# Program Overview

AmpFi enables professional-grade, non-custodial *spot-only* crypto automation with momentum-first entries, disciplined exits, and an AI/ML overlay for probabilistic context. We partner two ways:

Reseller

White-Label

## Reseller Program

**Who it's for:** advisors, educators, communities, creators.

Commission: **20–30%** of subscription (lifetime while active)

Assets: **spot crypto only**; users connect their own exchange APIs (no withdrawals)

Enablement: co-branded assets, webinars, onboarding support

Compliance: software-only; no investment advice

## White-Label

**Who it's for:** exchanges, fintechs, institutions needing branded automation.

Branding: custom domain, theme, and collateral

Deployment: dedicated/private cloud on AWS

Integration: API access; custom modules on request

Support: training, SLAs, roadmap alignment

## Value Proposition

Non-custodial: funds remain on the user's exchange

## Partner Requirements

Compliant marketing; no performance promises

We use cookies to improve your experience and analyze site usage. Analytics cookies help us understand how you interact with our site.

Institutional discipline: sizing, stops, daily guardrails

ML overlay: probability context (no outcome guarantees)

For WL: brand assets & technical POC

## Onboarding Steps

Intro call → goals, scope, use cases

Agreement → reseller or white-label T&Cs

Enablement → materials, training, test accounts

Go-live → campaigns, webinars, success metrics

## Important Disclosures

AmpFi provides software that automates trading on connected spot-only exchange accounts using user-defined parameters. We do not take custody, do not provide personalized investment advice, and do not guarantee outcomes. Trading crypto involves risk of loss. Regional availability depends on each exchange and local regulations. Users control API keys and should never enable withdrawals.
